

Cara

Overseas Integrated Marketing (IMC) · Influencer & Community · Brand Narrative · AI / Consumer Products

cara.liquanqiu@gmail.com

PROFESSIONAL SUMMARY

1. Overseas integrated-marketing (IMC) and growth leader for AI and consumer products, skilled at uniting PR, influencer, social, community, affiliate, and paid media under one brand narrative to take products from a 0-to-1 cold start to scaled growth — with a rare combination of China-market and overseas expertise.
2. Runs overseas IMC end-to-end: PR and tech-media outreach, influencer seeding + affiliate programs built 0-to-1, social matrix (Twitter/X, LinkedIn, TikTok), Reddit / Discord community, and paid amplification.
3. Deep understanding of Western-market user behavior, media ecosystems, and the creator economy; ran the same repeatable IMC playbook across multiple products (a new incubated product + Meitu's RoboNeo) with quantifiable results.
4. AI-native operator who also builds product and writes code: builds automated marketing pipelines with Claude Code / OpenClaw (keyword research, landing-page generation, data review, account-matrix management), and has led AI product design and prototyping — Meitu's viral-video deconstruction & reconstruction system (part-time PM) and an independent side project (a blue-collar local-marketing creative agent) — shipping experiments fast with a lean team.

WORK EXPERIENCE

PlawLogic | Head of Growth & Operations | Sep 2025 – Present

Overseas Integrated Marketing (IMC) · Influencer & Community · AI consumer products · 0-to-1

A new incubated product (under NDA)

- Owned the product definition, overseas brand narrative, and external messaging.
- Built the user-operations engine: led Reddit-community needs discovery and a closed feedback loop — via paid promotion, posts, and a purpose-built subreddit — building a seed-user community that turned users into product co-creators and acquiring the first 100 seed users at low cost.
- Led influencer seeding + referral loops: via an account matrix and seed users, drove influencer seeding and word-of-mouth referral to scale seed users, funneling them into a Discord community as a lasting brand asset.
- Recruited core users and KOC creators to co-create ad creative, then amplified the winners with paid spend — closing a content → community → paid loop.

Drama.Land (AI music video)

- Influencer partnerships & attribution: built the 0-to-1 influencer-collaboration system (including CPS / affiliate revenue-share); combined long-tail KOC collaborations with second-edit paid amplification to compute a blended ROAS, pinpointing exactly which creator types and selling points were worth scaling; planned and ran partnerships with million-follower influencers, managing the full path from impressions → private-channel link distribution → download attribution to optimize CPM and blended ROAS.
- Product & skill tuning: reverse-mined high-value music sub-genre scenarios from user behavior and led skill tuning across five distinct styles; built scenario-based model routing and reverse-engineered the subscription + credit-pack pricing strategy from the gross-margin mix, growing gross margin on the new version.
- Experimentation & conversion: led onboarding-to-paid A/B testing, bucketing traffic across landing-page variants to find the best landing page and paywall-trigger mechanism per scenario and lift paid-conversion rate.
- System & result: built the ad-testing & validation SOP and customer-complaint automation, reaching USD 1M ARR in 4 months (Meta Day-0 ROAS above 1, Google Day-0 ROAS 0.7).

Across products

- Built the full onboarding-to-paid conversion funnel and ran three focused optimization sprints on performance, pricing, and landing-page conversion: cut performance-related complaints by 30%, improved pricing gross margin by 10%, and lifted tool landing-page conversion by 20%.
- Built an AI-native growth pipeline on Claude Code / OpenClaw: keyword research, batch landing-page generation, ad creative & content, automated data review, and account-matrix management — turning one-off experiments into reusable playbooks so a lean team ships fast.

Meitu | Head of Innovation Operations Center | Jun 2023 – May 2026

Overseas Integrated Marketing (IMC) · Full-Stack Product Operations · AI-Native Team Building

Strategy & Analysis (reporting to the CPO)

- Reported directly to the CPO on overseas strategy and positioning; built a company-level imaging map — an automated system monitoring market share, user scenarios, and usage habits across the design, video, and image verticals (app + web), by country and competitor — surfacing new-track and opportunity insights for six business units; and led due diligence, post-investment management, and synergy strategy for investments / M&A including Zcool.

Operations Lead (owned revenue targets + overseas IMC)

- Led full-stack operations and overseas integrated marketing for three AI products — Vmake (overseas), RoboNeo (overseas), and MVLAND (global) — personally carrying the revenue target and building a ~4-person AI-native team per product for fast decision-making.
- Integrated (IMC) motion (RoboNeo as the case): starting from product definition and selling-point sharpening, ran external PR and tech-media outreach to build awareness; used an account matrix + seed users to run influencer seeding and word-of-mouth referral to scale seed users; funneled them into a Discord community as a lasting brand asset; then recruited core users and KOCs to co-create ad creative and amplified with paid — a full loop from cold start to scale.
- Channel mix: orchestrated overseas social (Twitter/X, LinkedIn, TikTok), Reddit / Discord communities, influencer partnerships (incl. CPS / affiliate), brand collaborations, account matrices, and EDM, plus the China ecosystems of Xiaohongshu and Douyin — carrying one unified brand narrative across every channel for cross-channel amplification.
- AI-native ops: built an automation growth pipeline on OpenClaw covering automated data review, account-matrix selection and content creation, SEO keyword analysis, and landing-page build & launch, driving high output-per-head for a lean team.
- Outcomes: RoboNeo hit #1 on category charts in 10+ countries and #1 on Brazil's overall chart (app), plus RMB 3M gross profit (web); Vmake reached USD 500K gross profit in ~1 year; MVLAND reached USD 500K ARR in 4 months.
- Process metrics: Reddit 2,000 karma in 2 weeks driving steady organic traffic; EDM open rate 20%; a Xiaohongshu topic +200% traffic in one month; influencer channel high-AOV with ~7% paid-conversion vs. sign-up; Meta Day-0 ROAS up to 1.9.

AI Creative System (viral-video deconstruction & reconstruction · Part-Time Product Manager · Dec 2025 – Present)

- Background: solved the overseas ad team's creative-production bottleneck — each creative took 2 hours by hand, too slow for the every-3-days refresh cadence, so the team kept missing trend windows and delivery costs rose; owned the build of an AI system to deconstruct and reconstruct winning ad videos so overseas delivery could respond fast to the market.
- Product planning: ① Needs discovery — mapped the overseas ad team's workflow and identified two core pains: a fragmented process with tool-switching and manual hand-offs, and uncontrollable AI generation with frequent rework. ② Path definition — surveyed 10+ AIGC creative tools, defined the product path (deconstruct → slot replacement → shot editing → video output) and a dual-mode architecture (fixed workflow + Agent-driven node canvases); assessed leading video/image models and set a Gemini + Seedance multi-model strategy.
- Solution design: ① Semantic architecture — a four-layer semantic architecture (theme / narrative / shot / execution) and a three-state structure (original / abstract / rewritten) for immutable data, reusable templates, and traceable edits; identity anchors + asset-slot mechanisms for shot consistency and local replacement. ② Agent architecture — a three-layer Agent loop (task scheduler auto-orchestrating execution, node executors mapped to business functions, LLM decision points for minimal-workflow planning, multi-dimensional evaluation, and retry-strategy adjustment); gate approvals, A/B branch comparison, and editable nodes for an "Agent-driven, human-in-the-loop" canvas. ③ Prompt engineering — 15+ meta-prompt templates pipelined across four stages, with structured input/output per stage supporting cross-stage asset reuse/replacement and bad-case root-cause tracing.
- Delivery: ① Prototype built on FastAPI, Next.js, and React 19. ② Evaluation/iteration — a QA checklist (5 categories, 18 checkpoints) and a human-in-the-loop testing system; iterated on bad cases: abstracted visual noise into overwrite slots for full asset coverage when inpaint repair was unstable; built a generate/merge/stylize three-way judgment system for invalid generation and missing output on non-narrative shots; merged serial calls into a single matrixed analysis for multi-entity latency, cutting time from 10 minutes to 40 seconds.
- Outcome: through connected pipelines and a controllable architecture, freed ~80% of manual effort and let the team process many creatives in parallel, effectively supporting the ad-delivery business.

ByteDance | Senior Strategy Manager | Dec 2020 – Jun 2023

Product Growth · AI Innovation · Investment Management

- Led AI product innovation for TikTok's mental-wellness initiative, reaching 100,000+ users and improving retention.
- Managed an RMB 20 million investment fund, leading sourcing, investment, and post-investment management for AI health & safety and cutting-edge medical projects; built 0-to-1 the onboarding, training, and content-distribution system for charities/NGOs on a philanthropy platform.

New Oriental | Head of Business Analytics | Oct 2019 – Nov 2020

User Growth · Acquisition & Conversion · Multi-platform Operations

- Orchestrated growth across user, teacher, and sales sides, building a full-funnel performance system and lifting conversion rate by 20%.
- Built a machine-learning user-segmentation model (random forest, 85%+ accuracy) for precise targeting; optimized budget utilization to 80% through forecasting.

Alibaba (Ele.me) | Business Analytics Manager | Jan 2019 – Sep 2019

Supply-Side Growth · Merchant Acquisition · Market Share Expansion

- Drove merchant-side supply growth across a two-sided marketplace; managed a RMB 10 million subsidy program across 15+ provinces, increasing merchant count by 4.5% and raising national market share by 12%.

DiDi | Regional Operations Manager | Melbourne / Tokyo / Latin America | Jan 2017 – Dec 2018

Regional Operations · Customer-Service System Build · Driver-Side Growth

- Led the rollout of the customer-service product across Australia/New Zealand, Brazil, and Mexico.

- Built the full customer-service system for Spanish-speaking markets end-to-end — vendor selection, staff training, and performance evaluation.
- Drove driver-side operations and penetration growth across Australia and New Zealand.

Accenture | Senior Business Analyst | Apr 2013 – Dec 2016

Market Entry & Growth · Strategic Planning · Digital Transformation

- Led market-entry and expansion projects for enterprise clients (China Post, China Resources), delivering strategic roadmaps.

SIDE PROJECT

US Blue-Collar Local Marketing Creative Agent (LocalAd Studio) | Independent build · Claude Code · 2026

- Built an AI creative-production agent for US blue-collar / home-service local advertising (plumbing, HVAC, cleaning, moving): deconstruct winning local-service ads → slot replacement (city / service / season) → shot & copy editing → composited output; four-layer semantic architecture + identity anchors / asset slots + multi-layer production orchestration (gate approvals, A/B variants, editable nodes) + 15+ meta-prompt templates, prototyped on Claude Code + FastAPI / Next.js.
- Outcome: lifted creative output from ~8 pieces per person per day to hour-level batch production, freeing ~80% of manual effort and supporting high-frequency local-ad creative needs across many cities and services.

EDUCATION

The University of Melbourne | Master of Information Systems (Minor in Finance) | 2010 – 2012

Huazhong University of Science and Technology | Bachelor of Electronic and Information Engineering | 2006 – 2010

SKILLS & LANGUAGES

Core Competencies: Overseas Integrated Marketing (IMC) · Brand Narrative & PR · Influencer/KOL & Affiliate Programs (0-to-1) · Social Matrix & Community (Reddit/Discord) · Performance Marketing · Data-Driven Decision-Making · Cross-Functional & Cross-Border Team Management

AI & Tools: Claude Code · OpenClaw · Workflow Automation · AI Agent Product Operations · ML User Segmentation (Random Forest)

Languages: Chinese (Native) · English (Fluent, working language) · Spanish (Learning)
